EDUCATION

M. S. Ramaiah University of Applied Sciences

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.82/10

Bengaluru, India

2023 – 2027

TECHNOLOGIES

Languages: Python, Java, JavaScript, SQL

Artificial Intelligence: Machine Learning, Multi-Agent Systems, NLP, LLM Applications, Retrieval-Augmented Generation (RAG), TensorFlow, PyTorch, Scikit-learn

Frameworks & Libraries: Next.js, React, Flask, Streamlit

Cloud & Databases: Google Cloud, Supabase PostgreSQL, MySQL, MongoDB

Developer Tools: Git, GitHub, Docker, VS Code

Core Concepts: Data Structures, Object-Oriented Programming, DBMS, Software Engineering, REST APIs

SELECTED PROJECTS

Orion-OS: Multi-Agent AI Operating System | GitHub

Python, Google Cloud, Multi-Agent AI

- Designed and developed a cloud-native multi-agent AI operating system capable of autonomous planning, reasoning, execution, and long-term memory through specialized collaborative agents.
- Implemented Retrieval-Augmented Generation (RAG), persistent memory, Model Context Protocol (MCP), and governed agent orchestration to improve reliability and contextual decision-making.
- Engineered a modular architecture supporting intelligent workflow automation, scalable agent communication, and human-in-the-loop validation for complex task execution.

CalcLoop (CalcNest) | GitHub

Next.js, TypeScript, Supabase

- Developed a production-ready SaaS platform for university calculator rentals using Next.js, Prisma, and Supabase PostgreSQL.
- Implemented secure college email authentication, role-based dashboards, QR-enabled rental workflows, and inventory management.
- Designed scalable backend APIs with validation, analytics, and real-time rental lifecycle management.

PUBLICATIONS

- Co-authored the research paper "*Slenderizer: Development, Characterization, and Evaluation of Edible Biopolymer Food Wrappers for Obesity Mitigation and Sustainable Packaging*", published in the **Proceedings of the National Conference on Advances in Engineering and Technology (NCASET-2025)**.

ACHIEVEMENTS

- Secured **2nd Place** at **Anveshan South Zone 2026** for the research project **Slenderizer**.
- Led and organized more than **15 technical and innovation events**, engaging over **1200 students** through institutional entrepreneurship initiatives.
- **Finalist** at the **International Anveshan Innovation Competition** for sustainable biomedical packaging research.

LEADERSHIP

Vice President

2025 – 2026

Institute Innovation Council (IIC)

Bengaluru, India

- Directed innovation and entrepreneurship initiatives impacting over 1,200 students through hackathons, technical workshops, speaker sessions, and startup-focused events.
- Collaborated with faculty, industry experts, and student teams to execute innovation programs while fostering interdisciplinary problem-solving and leadership.

Head of External Engagement & Sponsorship

2025 – Present

The Startup Society (TSS)

Bengaluru, India

- Built partnerships with startups, industry professionals, and sponsors to support entrepreneurship events and technical initiatives.
- Led external communications and sponsorship outreach, strengthening industry engagement and collaborative opportunities for student-led programs.

CERTIFICATIONS

- Google Cloud – Engineer AI Agents with Agent Development Kit (ADK)
- Oracle Cloud Infrastructure 2025 AI Foundations Associate
- IIT Madras – Programming and Data Science Foundations
- Infosys Springboard – Introduction to Deep Learning

ACADEMIC FIELDS OF INTEREST

Artificial Intelligence | Autonomous Systems | Machine Learning | Software Engineering | Cybersecurity | Cloud Computing | Distributed Systems
